Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/18/06 has been entered.
2. New claims 31-36 have been added. Claims 1-36 are pending in the application. Claims 15-30 have been withdrawn from consideration.

Election/Restrictions

3. This application contains claims directed to the following patentably distinct species:

Species 1 (Claims 1-10 and 31-33) – a solid free-form fabrication system for producing a three-dimensional object with any nanoparticulate filler dispersed in any build material at from 0.1 to 20wt%;

Species 2 (Claims 11-14) - a solid free-form fabrication system for producing a three-dimensional object by inkjetting a build material with nanoparticulate filler dispersed in any build material wherein the filler is hydroxyapatite, organic-inorganic hybrid nanocomposites, curable liquid crystals and combinations thereof at any weight content;

Species 3 (Claim 34) - a solid free-form fabrication system for producing a three-dimensional object by dispensing an acrylate-based UV curable build material with 2wt% hydroxyapatite, having a rod-shape and from 60 to 100nm in size, dispersed in the building material;

Art Unit: 1773

Species 4 (Claim 35) - a solid free-form fabrication system for producing a three-dimensional object by dispensing an acrylate-based UV curable build material with 2wt% montmorillonite, having a platelet-shaped and 1nm to 400 nm in size, dispersed in the building material;

Species 6 (Claim 36) - a solid free-form fabrication system for producing a three-dimensional object by dispensing an acrylate-UV curable build material with 2wt% montmorillonite particulates modified with a quaternary ammonium salt dispersed therein, wherein the particulate has a platelet-shape and are from 1 nm to 150nm in size;

4. The species are independent or distinct because the nanofiller type, size and/or content are distinct and/or the build materials are distinct.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monique R. Jackson whose telephone number is 571-272-1508. The examiner can normally be reached on Mondays-Thursdays, 8:00AM-4:30PM.
